

PRESS RELEASE

The United States of America, ignoring international law, decisions of United Nations and historical and social facts, decided to move American Embassy to Jerusalem, and despite all reactions to this decision, made an invitation to a new crisis to instability and chaos in Middle East. Undoubtedly, the United States of America prompted terrorism state Israel to massacre through its decision. In addition, the concurrence of this provocative decision with 70th anniversary of Nakbe/ Catastrophe day shows malevolent attitude of the United States of America and displays provocative and provoking aim of this incidence.

It is not acceptable for humanity not to totally and sonorously put a lid on the violation of innocent Palestinian people's rights by Zionist state, depriving Palestinians from the most basic rights, making them live in almost like an open-air prison and finally Israeli regime's daring to make this massacre. Undoubtedly, this will be a disgrace in history and under this circumstances, Palestinian people will use their right of self-defence. However, we, Trakya University think we should not be silent to this situation and curse the actors and partners of this violent massacre performed under crusade mentality of 21st century.

Commencing fire against Palestinians organizing peaceful protest demonstration in activities on 14.05.2018, occupant Israel and its protector United States of America added a new one to their state terrorism crimes through using violence against oppressed people in Middle East. Within this context, we invite United Nations and International Criminal Court of Hauge to duty and therefore bring prosecution against Donald Trump and Benjamin Netanyahu, if international law still exists and humanity has some kind of conscience.

We offer our condolences to the martyrs of innocent and oppressed Palestinian people and wish recovery for the injured people from God. We also believe all world will finally understand that not only our brothers becoming martyrs while defending their homeland and honours but also law was slaughtered. Therefore, we invite everyone with conscious to adopt attitude against The United States of America and Israel, to shout out injustices and to act with solidarity with Palestinian people. Inasmuch as the statement of Aliya Izzetbegovic for the slaughtered Muslims in Bosnia, "the only thing we will remember when it's all over is the silence of our friends".

Respectfully announced to the public...
